miguelborrasroig@gmail.com   638 486 622   Valencia, Spain   linkedin.com/in/miguel-borras-roig   miguelbr16.github.io

Data Scientist and Generative AI Engineer with hands-on experience building LLM-powered automation pipelines and enterprise AI solutions. Proven track record at NTT DATA delivering RAG-based document extraction and NLP-driven process automation using LangChain, Azure OpenAI, and OCR. Currently driving data-led marketing decisions at RNB Cosméticos through advanced analytics and BI dashboards. B.Sc. Data Science, Universidad de Valencia (2024).

## EDUCATION

**B.Sc. Data Science |**  
**Universidad de Valencia (ETSE-UV)**  
2020 – 2024

- Dissertation: Business Plan for a Data Science Consultancy — full business plan with financial model, market research with 300+ SME surveys, and strategic analysis (PESTEL, Porter, SWOT).

## LANGUAGES

- Spanish (Native)
- Valencian (Advanced)
- English – Advanced (bilingual schooling K-12 + 1 year San Diego, USA + exchange Liverpool, UK)

## ADDITIONAL INFO

Driving licence | Own vehicle | Full availability | Open to relocation

## SKILLS

**AI & Machine Learning:**  
LangChain, OpenAI API, Azure AI, Machine Learning, Deep Learning.

**Programming Languages:**  
Python, SQL, R.

**Data Visualisation:**  
Power BI, Qlik Sense, QGIS

**OtherTools:**  
PyShark, Docker

## PROFESSIONAL EXPERIENCE

**Generative AI Engineer | NTT DATA**   Feb–May 2024 & Nov–Dec 2024  
*2 internship periods*

- Designed and deployed an automated document intelligence pipeline using LangChain, Azure OpenAI, and OCR to extract structured data from unstructured PDFs, significantly reducing manual processing.
- Built an NLP-based transcript analysis system for a major telecom client, automatically identifying contracted service packages from calls and reconciling discrepancies with their internal database.
- Worked within Azure cloud infrastructure (Azure OpenAI Service) to integrate GPT models into production workflows.
- Collaborated in agile cross-functional teams delivering scalable AI solutions for enterprise clients.

**Data Analyst – Marketing | RNB Cosméticos**   May 2025 – Present

- Analyse market trends, product performance, and consumer preferences (packaging, textures, formulas) to guide strategic marketing decisions.
- Build and maintain interactive Power BI and Qlik Sense dashboards to track KPIs across product lines and sales channels.
- Use Python and Excel for data cleaning, statistical analysis, and forecasting of market and sales trends.
- Translate complex data insights into actionable business recommendations for cross-functional teams.

**Amazon Seller & E-commerce Operations**   May 2022 – Present

- Support management of an Amazon e-commerce store: product listings, inventory, pricing strategy, and performance analytics.
- Contribute to operational and growth decisions, developing practical skills in online retail and data-driven decision making.

**Digitalisation Consultant | VenetianBlinds**   Feb 2023 – Present

- Technical Audit & Advisory:** Act as the technology lead for the business, reviewing, configuring, and validating the web infrastructure.
- Transformation & Scalability:** Analysis and optimisation of the online store's operational methods to modernise the business, building the technological foundation to automate processes, streamline daily management, and attract new customers.
